## AxoGraph X for Windows Commercial Release

We're pleased to announce that AxoGraph X for Windows is now available for purchase from our web site, [axograph.com](http://axograph.com)

- pricing for a Window license is the same as for a Mac license
- for faster processing, we recommend using an institutional credit card
- we also accept wire transfers, purchase orders, etc
- for step-by-step instructions, see the '[How to Order](#)' web page

### Cross Platform License

Each 'Lab Pack' or 'Office Pack' license permits activation of AxoGraph on several computers. These can be Mac or Windows computers, or a mixture of both. Windows computers can be added to an existing license (assuming that it has unused activations).

### Pricing Unchanged

The entry level 'Office Pack' license is US\$590, and permits installation on two computers. The fully loaded "Lab Pack plus Electrophysiology Tools" is \$1,890 (about half the price of pClamp), and permits installation on three computers (1 data acquisition and 2 offline analysis machines).

### Update Available

AxoGraph X version 1.2 is now available for download. This is a synchronous update of both Mac OS X and Windows versions. It contains many new features including...

- support for cheap, low-noise National Instruments digitizers
  - currently only for Windows
  - analog input and output only - digital I/O coming soon
  - we're working with NI's engineers to improve performance under OS X, and progress is being made
- preliminary support for CED 1401 mk II digitizers
  - analog input and output only - digital I/O coming soon
- dashed lines can be used for drawing plots

## New Web Site

We have finally secured the web domain axograph.com (until recently it was parked, unused in Japan). Everything has been ported to the new site, but the old site will remain active for now.

### User Forum Launched

Several discussion boards have been created on our web site. It's still in its infancy, but we hope this will gradually become a useful adjunct to our tradition technical support. Search or browse the posts, or join a discussion at [axograph.com/forum/](http://axograph.com/forum/)

The discussion boards are...

- *Problems or Questions*: Ask the AxoGraph user community for advice
- *AxoGraph Central*: Developer's blog - discover features, learn advanced techniques, and latest developments
- *Shared Plug-Ins*: Custom plug-in created by users and developers

### Office Closed

There will be only limited sales and tech support for the first two weeks of July.
